

The Constitution.

ATLANTA, GA., MAY 6, 1879.

The yellow fever has broken out at Port-au-Prince.

The criminal calendar blooms out red and ominous to-day.

Pills were introduced in both houses of congress yesterday prohibiting military interference at elections.

Instead of going to war themselves, these western editors should employ able-bodied substitutes.

JOHN SHERMAN is today snugly ensconced in his native Ohio. This adds another thunderbolt to the Sherman boom.

It gives us pleasure to state to the organs that the democrats were getting along comfortably at last accounts. They are so well, in fact, that they will succeed in taking some of the crumples out of Hayes's horns.

In all the theatrical critics of the newspapers were as vigorous and as determined as the man who fired at Booth's equivoque, we would have less bad acting, for in that event no competent and conscientious critic would go without his shotgun.

GOVERNOR CHANDLER, of Maine, who is at present in Atlanta, is exceedingly hopeful of a democratic victory in 1880. When you do strike a genuine northern democrat, ten to one you hit a hardshell.

They never give up, they never get tired, and they never lack enthusiasm. Dr. Garcelon, for instance, thinks we will carry Maine this fall.

BILL CHANDLER has been elected secretary of the republican campaign committee. Speaking of this able citizen, reminds us that he is connected with the national emigration "aid" society, and we are further reminded that the emigrants are now clamoring for relief.

Has Bill, through his committee, ever "aided" any of these unfortunate creatures.

A voracious revolution has been organized and dispersed in Panama. We rather like the South American idea. When times get dull in these little states, the corporal who governs in the suburbs puts an advertisement in the weekly paper announcing that a revolution will take place. There is no revolution on account of the weather. The people are at their seats at the hour named, the revolution begins at noon, is over by dark, and the citizens all attend the same church in the evening. There is something artistic in this.

It will come to be conceded by the thinking men of all parties—the men who have really patriotic aspirations, and who have some sort of reverence for the federal constitution—that the recent veto message is the weakest and yet the most significant state paper that ever emanated from the white house. Its weakness is the result of one of the inherent qualities of the present administration, but its significance lies in the fact that it embodies, in an aggressive and intolerable shape, the worst dogmas of centralization that have emanated from the radical revolutionists who for twenty years, have been endeavoring to destroy the constitution.

Senator Thurman is said to characterize the message as a monstrous document, and this, under the circumstances, is perhaps the aptest term that can be applied to it.

It is safe to say that journalism in Indianapolis is lively, if not progressive. There are two newspapers in that fervid city—the Herald, edited by Rev. George C. Harding, who was for many years the victim of poor Hatcher's imitable humor, and the Democrat, edited by Calvin A. Light. Mr. Light said something of Mr. Harding didn't like, and thereupon Mr. Harding went gunning for Mr. Light. He followed him to his residence, and attempted to perforate him with a pistol. This Mr. Light prevented, and George was placed in custody. Yesterday morning he entered Light's office and once more proceeded to use his pistol. Light escaped unscathed, and broke both his ankles. Harding is in jail, and there is now little or no danger that he will shoot anybody else to-day. Brethren should all dwell together in unity. Light evidently said something very naughty about Harding, but the probability is he would have readily forgiven the latter if the proper advanced and sane laws were placed in custody.

As Separate Bills.

A bill to prohibit the use of troops at the polls is now before both houses. It is the sixth section with the other "civil" strikes out, and with all the other side issues upon which another veto might be conveniently hung, left out. It relates entirely to the use of troops at the polls, leaving to other measures the completion of the task of preventing federal interference with elections.

No official declaration of the new democratic program was expected, but the wise men of Washington say that the two caucuses have substantially agreed, as follows:

1. To send up to the veto bill the sixth section amended as we have stated.
2. To send after it the legislative bill in its present shape, or at least with all its riders repealing the test oath, the supervisors and the deputy marshal clauses of the revised statutes.
3. If the occupant of the executive mansion votes the legislative bill, the political clauses separately; but each of the other political amendments to be a bill of itself. It is thought that he will sign the repeal of the test-law.
4. When all these bills have run their course, and not until then, a caucus is to be called to determine whether congress shall pass the two appropriation bills without riders, or whether by a joint resolution it shall continue the appropriations on the basis of those for the current year, until the first day of January.

This program commands our unqualified admiration. It affords no room for retreat or political blunders. It makes the democrats masters of the situation. It will compel the republican members to put themselves on record in a manner most distressing to them; for it will make the last one of them face the music preparatory to the appeal to the people. To work out this programme will require all of this and the next month, but it will be time well spent if the issue between congress and the executive, stripped of its sophistries, is thereby presented plainly and squarely.

The democrats have not backed out, and are not in the least disconcerted; and before General Garfield has finished his "last" laugh, there will come creeping over the radical heart a premonition that the veto business is about to miscarry.

Atlanta to New Georgia.

Some irreverent person somewhere or other tells a story of a man who was out hunting. He shot at a squirrel. The squirrel dropped. As he stepped forward to pick up his game he found that a neighbor, who was a doctor, had already taken him to his game-law. "Give me my squirrel!" he said. "He is mine," replied the doctor; "I killed him." "You did?" with a sneer, "well, what were you for several generations. In spite of a streak of todayism running through them, they are fresh, graphic, pungent and altogether readable; and if Young were perfectly free to draw small literary cartoons of Grant and the pinups who make up his party, they would be equally innocuous. We pay this tribute to John Sherman because we might forget it at the proper moment.

The venerable Horatio Seymour refuses to again enter public life. He prefers to spend the remainder of his days in an attempt to slout omelette.

Will somebody be kind enough to cut a notch in the door-facing? In the midst of all this confusion, and while the Nation is still in deadly peril, the New York Tribune has found time to acknowledge that at least a few of the negroes who have been prevailed upon to join the inane movement to Kansas have left comfortable homes to face starvation. We contend that every industrious negro who has left his home is the victim of republican swindlers, and this fact will be made apparent in the end.

The delicacy and discrimination with which John Sherman is handling his boom entitles him to the respect and sympathy of every well-oriented mind.

GRANT, it is stated, wants Postmaster-General Key to have the second place on his ticket. This will be a tremendous addition to the boom. With Key tied as a conciliator the southern people would doubtless fairly foam at the mouth with enthusiasm.

What has become of Brother Clymer, of Ohio? Has he gone to aid Brother Harper and Corporal Bill Kernan in wielding their "treacherous and powerful blades"? Some how or other we have missed Clymer lately.

A vote of two noes whenever a republican took one of the democratic managers and a vote of one yes whenever a republican took one of the democratic managers, the republican bill, the customary remark was made by the republican managers. That was the case with the bill for the relief of the late President Grant, and generally put the right man in the right place.

The provincial republican newspapers of New York state are now engaged in entertaining their readers with the most masterly effort of Conkling's life. As an effort to make figures tell stupid lies that even a school-boy can detect it is indeed masterly.

JOHN ROSSELL YOUNG's letters to the New York Herald are to be envied, and may be said of them in all seriousness. They are far superior to any letters of travel that have been written by an American. They are full of interest, and in spite of a streak of todayism running through them, they are fresh, graphic, pungent and altogether readable; and if Young were perfectly free to draw small literary cartoons of Grant and the pinups who make up his party, they would be equally innocuous. OUR GALLANT FIREMEN.
The Annual Parade and Firemen's Picnic, which was held yesterday morning at an early hour, was productive of much amusement to the members of the Atlanta fire department and their numerous friends. They imagined that they saw better of the parade than they had seen before. The parade was held in the morning, and the firemen were in the best of spirits. They were in the best of spirits, and they were in the best of spirits. They were in the best of spirits, and they were in the best of spirits.
